Proposal Type: Regular
General Category: Astronomy
Observation Category: Extragalactic
Total Time Requested: 100 Hours

Proposal Title: The Arecibo Galaxy Environments Survey (AGES) - A precursor proposal

ABSTRACT:
In this Extragalactic ALFA consortium precursor proposal we are requesting 100 hours of observing time to test observing strategies, define the necessary calibration procedures and obtain data that can be used as initial input into our data reduction software. In addition the proposed observations have been designed to guarantee high calibre early scientific results.
