Proposal Title: A new search for pulsed emission from the magnetar SGR 1900+14

ABSTRACT:
We plan to use the new 800-MHz single feed capability to search, with unprecedented sensitivity, for high-frequency radio emission from SGR 1900+14.

Remote Observing Request

- Observer will travel to AO
- Remote Observing
- In Absentia (instructions to operator)

Instrument Setup

C S-high

Atmospheric Observation Instruments:

Special Equipment or setup: none

RFI Considerations

Frequency Ranges Planned

3000-6000
